

# BE VISIBLE ONLINE

## WEB DESIGN

Show doctors and patients you're ready to be their pharmacy with a professional custom website. Enhance your business credibility and build trust with prescribers. A professionally designed website will set you apart from other pharmacies and tell your potential patients you are serious about their healthcare.

## ONLINE REFILLS

Expand how customers reach your pharmacy and allow customers to input their prescription refills directly on your website. Most patients and doctors expect pharmacies to offer refills online. Online refills serve as an after-hours / 24-7 refill system for patients and prescribers.

## AFFORDABLE

With ConfigRX we offer low cost monthly options for our clients to have a **custom non-template** website. Currently have a templated website? Let ConfigRX modernize your website to have a professional look on mobile devices.

## HASSLE-FREE

All of our websites are created to make it easy for you to update them yourself. However, if you need us to do updates we can do those for you. We understand your business changes and your website will need to change too. Ask us about our free **Facebook** and **Google Maps** professional setup for website clients.
