

ABOUT OUR COMPANY

ConfigRX is an industry-specific technology consulting firm focused on the independent pharmacy industry. ConfigRX helps pharmacies innovate and transform by leveraging our unique insights, differentiated services and cost-saving partnering models. Since 2010 we have been helping owners start, buy and operate their pharmacy efficiently to grow their business through various forms of technology. It doesn't matter if you own one store or twenty, we ensure your technology is working for you.

WHAT WE DO?

Our goal is to help your pharmacy run smoothly and efficiently. We accomplish this objective through a combination of proactive remote monitoring, automated system management, and on-site network support. With our monitoring tools, we maintain a close eye on your network for efficient issue validation and remediation. We work with you to **prevent downtime** and allow technology to reduce costs for your pharmacy while using the right technology

WHY WE DO IT?

As business owners ourselves, we understand a business or pharmacy cannot operate efficiently if a piece of their technology is in downtime. We developed our managed services to catch downtime before it happens. Our clients have peace of mind knowing they have a highly skilled team of professionals monitoring, protecting and managing your mission critical assets and data.

REDUCE DOWNTIME AND STAY COMPLIANT

Why hire a local IT guy when ConfigRX can handle the pharmacies technology at a fraction of the cost? All while being HIPAA compliant.

REAL PHARMACY EXPERTS. GET REAL RESULTS.

WHAT'S INCLUDED?

- ✓ Managed and monitored network with real-time ISP monitoring.
- ✓ Monitored desktop with anti-virus, on-call support for desktop hardware.
- ✓ IT Assessment of all technology devices in the pharmacy.
- ✓ Managed security for each PC with real-time threat monitoring.
- ✓ Disaster recovery services to protect all pharmacy and patient data.
- ✓ Technology consulting and advice that can add value to your pharmacy.

SECURE YOUR PHARMACY DATA

Cyber crimes and data breaches are becoming a huge problem for health related businesses. ConfigRX manages your network to ensure your patient information and pharmacy data is secure from outsiders.

REDUCE DOWNTIME

With real-time monitoring of your technology we can often catch issues that cause downtime to your pharmacy before the downtime occurs. Saving you from having to make patients wait.

BE COMPLIANT WITH HIPAA

Malicious attacks or malware can exploit known vulnerabilities in your workstations. We protect your network and devices while keeping you compliant with HIPAA standards.
