

# UPGRADE TO VOIP

## PHONE SYSTEM TODAY FOR FREE

SAVE MONEY EVERY MONTH ON YOUR PHONE BILL

### VOIP phones reduce costs

With a VOIP system your pharmacy can save an average of **\$200/mo** when compared to an older analog/landline system. VOIP is newer and more secure technology that saves businesses thousands on voice services every year.

### \$21/mo per line on average

Most VOIP services charge \$21/mo per line, far cheaper than analog lines that charge \$35-40/mo per line on average.

### Easy install, plug & play

VOIP phones do not require a large base station. You simply plug in the handsets to your network and they are ready to go. VOIP phones are all cloud based meaning you manage them online. Configuration, reporting and voicemails are easily accessible and user-friendly. You don't need a trained phone tech to install and you keep your current phone numbers.

### NEXT STEP

Visit [configrx.com/voip](http://configrx.com/voip) and give us your pharmacy e-mail. We will contact you in 1-2 days with phone provider quotes in your area.

### Some of our telecom partners:

Spectrum, Time Warner, Charter, AT&T, Comcast, 8x8, Xfinity, Verizon, Vonage, Frontier Communications, Ring Central and more..
